Re: South Dayton Dump Site

Dear Mr. Bartman:

On October 5, 2005, Dayton Power & Light (DP&L) received a "special notice letter" relating to the referenced site. By correspondence to you dated October 24, 2005, and by earlier correspondence to you dated August 12, 2005, DP&L stated its willingness to negotiate a resolution of this matter through the *de minimis* settlement provisions of 42 USC §9622(g). However, DP&L has never received a reply to that correspondence.

DP&L remains willing to proceed under 42 USC §9622(g).

On a related matter, the "special notice letter" referenced above states "U.S. EPA has information indicating that [DP&L] may be a PRP under Section 107 of CERCLA." DP&L has requested on not less than two prior occasions (the most recent being October 12, 2005) that very information. In response DP&L has received nothing indicating why DP&L may be a PRP at the referenced site. Please provide that "information" referenced in the "special notice letter" indicating that DP&L may be a PRP at your earliest convenience.

Thank you for your attention to these requests.

Sincerely,

C: Charles Waterman III, Esq., Bricker & Eckler
